

Jan L: Forty Years of Putting Together Vacuums and Vacuum/Drill Systems that Last a Practice Life

By Bruce Levinson

Why bother with foreign companies with suspect commitment to podiatry, and their off-shore products that have weak vacuums, toy slip chuck handpieces, and poor service, when you can buy U.S. Jan L Inc. sells 7 different Nail Dust Extractor Models, one for every budget and practice style, designed, serviced and assembled in Mount Holly, NJ. We've been putting together vacuums and vacuum/drill systems that last a practice life for the past 40 years, and we're good at it! Visit www.janlinc.com to see our Model 100 A that will adapt to existing drills, our new SmartPro Vacuum File with integrated hose and cord, our portable Micro Vacuum, and our HEPA filtered 500 B that utilizes

an FDA-listed filter that's independently documented to capture particles as small as .02 micron, with 99.999% efficiency. As needed, the 500 B can be produced with an autoclavable E-type nose

cone that is also FDA-listed. There is nothing else like the 500 B! With regard to vacuum systems, we have seen many companies with inflated claims come and go, sticking customers with product that cannot be serviced. Save money by making the right choice the first time, not the second. Choose Jan L Inc.

cone that is also FDA-listed. There is nothing else like the 500 B! With regard to vacuum systems, we have seen many companies with inflated claims come and go, sticking customers with product that cannot be serviced. Save money by making the right choice the first time, not the second. Choose Jan L Inc.

We also supply 6 different electric drill systems, each with twist ring chucking. This chucking mimics surgical designs that properly secure burs. No cheap slip chucks that can release burs during use. Five of these systems are plug in types, and several provide for different handpiece choices. When required, our E-type handpiece utilizes an FDA-cleared nose cone. If electric power is not available,

our Mystisa is a powerful battery-operated unit providing 10 hours of continuous use. The Mystisa can also run from wall current when the battery is low. Be careful what battery drill you purchase in this market. There are several Mystisa knockoffs sold by larger distributors that feature plastic handpieces, mechanical components of low quality, and older NiCad battery technology that will not stand the test of time. All of our drill systems are serviced by Jan L Inc. technicians who understand them inside and out. Unlike other companies, our salesmen are also our technicians, allowing us to provide purchasers with tremendous product detail and technical assistance!

Our salesmen are also our technicians, allowing us to provide purchasers with tremendous product detail and technical assistance.

Jan L Inc. also supplies a large selection of burs with an FDA 510(k) regulation number of 878.4820. See them all at www.janlinc.com.

In our effort to offer a more complete line of quality product at great values, Jan L Inc. now sells three brands of podiatry chairs, Quality Plus brand hand instruments which adhere to the Inox Stainless Standard (no more mystery alloys), autoclaves (call for models and pricing), pre-fabricated orthotics sold only to podiatrists and produced in Europe to very high material and fabrication standards at reasonable prices, affordable ready-to assemble cabinetry, digital x-rays, dopplers, ultrasounds, and more. Leasing is available. Give us a call, let us know what you want, and we will put a package together for you.
